

## **DON'T UPSET US OR WE'LL LEAVE**

It never ceases to amaze me how obtuse some Believers in Yeshua are when it comes to talking about subjects and their disapproval of subject matter. If you don't know it already, Jim Wilhelmsen and I have a radio show on Blog Talk Radio. The name of our show is Opposing the Matrix; its format is to talk about UFO's, Nephilim, Paranormal stuff and correctness in the Church of Yeshua. For the longest time we would talk about things outside the box (by Christian definition) and try to explain that these things all have a demonic (fallen angelic) basis and that they are all sent by the Evil One to deceive and delude unbelievers and believers alike. About a year and a half ago we felt inclined by the Ruach Ha Kodesh to start talking about Holiness and Righteousness and getting prepared for the times that are heading upon this earth in the form of a "Strong Delusion." This delusion has already begun and will only get stronger and stronger until it deceives all but the Elect of Yahweh. Our premise is that there are hundreds of websites talking about Nephilim, UFOs and the Paranormal from a Biblical perspective. When we started out, that was not the case, but we have seen the torch light other torches and now the whole "field" of our research has been armed with such information that we once were just a few in possession of.

We have learned that Christians are no different than the world where this information is concerned. People tend to want a thrill and when new information is given, they soak it up like desert ground during a thunderstorm. The problem is that this infatuation with information about UFOs, Nephilim and such can only go so far before the information becomes corrupted by those who seek more out of something that is limited in scope. This information is like sterile water in a sterile test tube. The water remains sterile until we pour too much into the tube upon which time it starts to overflow and touches the nonsterile outside of the tube and then the counter and then the floor. You can only take something so far until you start to add or subtract from it to make it still palatable. This is what has happened to the Christian UFO research community's message about UFOs, aliens and Nephilim. The message became dull and boring because it was redundant so people started to twist the scriptures to make the words fit their ill-conceived notions about the message. Hence, you had good people who started to argue about their take on Biblical Scripture; sometimes ending in bitterness and/or envy.

Take for example the simple notion that Genesis, chapter six, notes that there was Nephilim on the earth before the flood, and that there would be "after." Simple right? Most people reading that scripture would ascertain that there were Nephilim before the flood, and that

there would be a resurgence sometime afterward. Well, now enter the Christian researcher who wants to expound on that. They totally ignore that Yeshua said that “As it was in the days of Noah, so will it be at the coming of the Son of Man.” Those two scriptures, Genesis Six, and Yeshua’s forecast about end times, go together like bread and water. Take either grain or water away from the mix and you do not have bread. So, some people started to come up with a notion that the Giants after the flood were not Nephilim, but ordinary giants (produced by too much pituitary growth hormone). They ignore that modern day giant come about from endocrine disorders whereas Biblical giants come from corrupted DNA; two different things. Modern day giants are not produced in multiform in families, but Giants in the Bible did (Goliath had giant brothers). Others choose to state that the post-diluvial Nephilim (giants) came about because Nephilim DNA somehow came onto the Ark through one of Noah’s daughter in-law’s or perhaps Noah’s wife herself. There is one problem there; one of the major purposes of the flood was to destroy all lines but Noah’s line because all of mankind had some corrupted DNA (as did the animals except for the ones Noah had on the Ark). To think that Yahweh Elohim would have allowed Nephilim DNA to come across the flood somehow on the Ark would make Yahweh Elohim into some sort of sado-masochist that likes to play around with the feelings and emotions and lives of men, and replaces the truth that Yahweh Elohim is a loving, caring and merciful God. What happens with this sort of practice is that it takes the simple beauty and truth of Scripture and turns it into some hideous sci-fi “B” movie.

So, being watchmen for Yahweh, Jim, myself and others attempted to face off with these sorts of heresies and show them for their folly. You would think that we would have had success because people want the truth, right? Well, maybe a little, but for the most part this brand new “neo-pagan” twisting of scripture became all the rage. People who would not be satisfied with simple gospel truth began to demand to know more about a subject that has limited scope.

Take for instance a good old American quarter dollar piece. Now, all I want to do is talk about the quarter dollar piece, right. I want to describe that its dimensions, its edges and the design on the front and back. That is ALL that I want to talk about. I form the “look at the quarter” foundation and have a website dedicated only to the modern quarter dollar piece. So someone writes on the site that two dimes and a nickel equal a quarter. Yes, that is true, two dimes and a nickel are equal in numerical value to the quarter dollar. Then I have another person write to me that a half dollar coin is two quarter dollar pieces and another person says that four quarters equal a silver dollar piece. Yes, that is true, but my page is about quarters. So, another person writes to me and says that our “one quarter” equals about 2.5 Paso’s in Mexico. Yes, that is true, but that has nothing to do with my quarter as I want to talk about it and admire it.

So, time goes on and another person writes and says that my quarter today is really only worth 2.5 cents if you value it in 1967-dollar value. Then another person writes and says that originally, quarters were made out of silver, and now they are not. All of these things are related (even if remotely) to my page that wants to talk about the modern quarter dollar piece. I really don't care about the other things, and although those things could be of interest to me or others, they have no place in my discussion, or my intent. They are all convoluted discussions of what I originally intended to be a subject about one coin and my admiration for it. By the way, I don't have such a website or liking for the coin; it was just an example. It was an example of how people take one thing and turn it all around to make it sound like they are talking about the original text and intent, but have gone down rabbit holes into other things.

What Jim and I have been told to do is to get away from the people who are digging the rabbit holes, and direct people back to Yahweh and His original intent. Since the death and resurrection of Yeshua the focus of the believer in Yeshua is to tell everyone about Him; to present His Gospel. Sure, the research into things like Nephilim and such other things are important because they teach that there is an enemy and "that" enemy will go through tremendous lengths to seek, kill and destroy the truth of Yeshua and His followers. The focus however of what we are to be doing is to warn of the enemy's tactics and then to tell people how to be saved, how to be free from this world's junk and how to fight the enemy with weapons that only Yahweh's Ruach can provide and utilize us to use. The focus of any ministry, no matter how outlandish it is in the gray areas of faith (nonessential doctrine) is always to lead the message back to Yeshua. If the message doesn't lead people back to Yeshua, but leads to strife, division, debate and/or other things that tear down people and the purpose for our Faith in Yeshua, then it is all a dung hill, yes, bull-crap. The author of bull-crap is Beelzebub, or Satan, who is the Lord of The Flies. The only thing that truly loves cow dung is the fly. See how they all go together. If your message is producing cow dung then it isn't from Yeshua, and it needs to be cast away as far as east is from west.

As the technical person as well as a host for Opposing the Matrix, I get to see the stats for the show. Two years ago, when Jim and I were talking solely about the supernatural in the way of UFOs, aliens, Nephilim and other things, our listener numbers were sky high and they kept growing. Right after that time, when we obeyed the voice of Yahweh, our numbers began to decline to where they are roughly 1/10 of what they were before. Yes, we seem to have lost 90% of our faithful listeners. Now, I have gone through things like this before. Way back in the past, when I would talk with people out and about, about the fluffy things of our faith, like love, peace, joy and such (all important things), people wanted to hear what I had to say. However,

when it came to talking about obedience, walking in holiness and such, people walked away. It seems that people prefer to hear about love, peace and joy, because these things they can relate to and things that are easy for them. But, when you start to talk to people about taking responsibility about their faith, to put it into action and to be obedient to what Yeshua said, people scatter like cockroaches when a light comes on. Think about it, when people scatter because of light it would appear that they prefer to walk in darkness. When people are obedient and strive for holiness in their walk with Yeshua it is like they have the sun around them and they shed Yeshua's light all around, but when people don't act in obedience and holiness, they are holding a little glow stick. When you hold a glow stick it illuminates, but who does it illuminate the most; it lights up the person holding the glow stick. Failing to strive for holiness and obedience to Yahweh Yeshua is the ultimate abuse of the title "Christian." Instead of bringing the light of Yeshua to a dying world, they light up themselves, and maybe their close friends; selfishness in its highest degree.

Now you would think that losing 90 percent of listeners is something upsetting. Truth be told, it is a blessing. Losing that many means that people were just tuning in to be entertained, not ministered to and certainly not to learn any important things of Yahweh, is a good thing. Frankly, it proves to me that the time of the harvest is at hand because the tares that have grown up alongside the wheat have matured so as to reveal themselves as tares, and not wheat. It means that the multitude that have a shallow faith; those whose seed has fallen on rocky ground or in shallow soil have not taken root and will wither and blow away. It means that that in some cases, the goats have been revealed in the sheep pen. It means that the remnant of Yahweh, true followers and true believers have matured and have been called out of this world to serve Yeshua unfettered by this world and its concerns.

Losing 90 percent of listeners because of holiness and obedience is a blessing that seems to me to be higher than other blessings. I'd rather have one person who listens than 99 that are there just to be entertained. That one person could affect the world in ways that only Yahweh knows possible. That one person will be prepared for the times that are being forced upon us. That one person will stand at the side of Yeshua when Yeshua points to the other 99 and says that He never knew them. That is what Jim and I are called to do, to call the remnant out and to bring them together. Will we talk about the other stuff from time to time? Sure, we will. However, we realize that time is short, workers are few and we don't have time to waste by casting pearls before swine or offering what is holy to dogs. Nobody comes to Yeshua unless Aveinu calls them. We seek those who are called, those who are set apart and those who are

serious about serving Yahweh and loving Him with all of their heart, soul and mind; their neighbor as themselves; and will forsake the things of this world and all that it has to offer.
