

GEMATRIA PROFILE

JOHN GEORGE TRUMP

By David Ben Yaakov

Created Words – John Trump was a pioneer in a day and age when technology was starting to take off. When he was handed Tesla’s work in January of 1943, he might have well thought it looked like gibberish, but he discovered that the gibberish was new terminology for things that science might have thought was years away or maybe it was not even imagined yet.

Yahweh – John G. Trump was brought up in a Protestant denomination titled, Reformed Church in America, which was the American branch of the Dutch Reformed Church. They are mainline protestant in nature and that being the case, John probably never received the message of Yeshua that all men need to be Born Again in Messiah’s Spirit. Scripture describes such churches as “having a form of Godliness but the power thereof,” so it is no doubt that John knew about Jesus and probably celebrated the holidays and such, but it ended there most likely.

January – Nikola Tesla died on January 07, 1943, in New York City. Three days later, on January 10, 1943, John Trump was given the works of Nikola Tesla which he started studying to see if they had any validity. He reported that the papers were gibberish and was told that the FBI wasn’t interested in the papers any longer. Trump kept the papers and later turned them over to his favorite nephew, Donald John Trump.

Unto Him Shall the Gathering of The People Be – Seeing that John grew up as a Dutch Reformatist, if he held any faith or teaching it would have been Calvinist in nature. Thus, the

“gathering of the people,” to him most likely would have been those who have been called by God from before the beginning of time and space. Predestination probably would have made more sense to him because it presents order and structure, and being a scientist, he saw the universe (most probably) as something governed by the laws of physics, and Laws have to have a lawmaker.

The Abomination That Cause Desolation – This numeric equivalent fits in well with John G. Trump and Tesla Technology. We will never know what Tesla discovered to its fullest extent, but Tesla talked almost as if the things that he imagined, dreamed of, or was shown have an esoteric source, in other words, technology possibly from fallen angels. If some of the ideas Tesla received were from fallen angelic entities it is a good bet that something that he was shown could be used to animate whatever will be placed in the Beit Ha Mikdash (Holy Temple), which will give it lifelike qualities. It is also possible, as Jim Wilhelmsen postulates, that part of the great lie will involve transhumanism, the manipulation of the human body (referred to as a Temple) to falsely offer immortality and godly attributes to humans in exchange for the rights to their souls. It does make sense that since Yeshua came as a human to die for humans, and foolish humans relinquish part of their humanity to become chimera or Nephilim then they would give up the right to ever become salvageable.

The Three Laws – Tesla claimed to have been able to travel time while remaining in a constant state, meaning that while sitting between two Tesla Coils, he was able to see past, present, and future at the same time. This is a violation or maybe a manipulation of Newton’s Three Laws of Motion. If John Trump was able to duplicate Tesla’s experiment then perhaps it explains why his nephew is somehow able to second guess the moves of his enemies before they even make them, and do it with a smile on his face.

Snow Piercer – This is a movie that was produced in 2014. The plot involved a dystopian society with the last remaining members of society circling the earth in a train that is operated by a perpetual motion machine. I won't go into the plot. Nikola Tesla was interested in perpetual motion and his concept for developing engines that could run on free energy could classify such an engine as being a perpetual motion machine. In theory, a true perpetual motion machine would produce more energy than the energy that it takes to run the machine. By acquiring free energy from the ambient atmosphere, such an engine in theory would be producing more work than the energy that it would take to power the machine. As has been mentioned before, John G. Trump did receive Tesla's papers from the FBI and it is conceivable that he did get to gander at Tesla's plans for a free energy machine. John's nephew, Donald Trump has touted a few times that there are new forms of energy that will be introduced that will make oil-powered energy obsolete.

The Reason for This Life Existing – John Trump was a man of physical science and religion. His nephew, Donald Trump has remarked that John used to have deep and philosophical conversations with Donald and Donald Trump has always referred to John Trump as his favorite uncle. There is mention in several places that John felt the same about his nephew Donald. As a physicist, John Trump knew about the laws of Physics and how they govern the universe. He knew that physics governed the existence of life and he also knew that Physics being a science of Laws must have a lawgiver. If it is true that Tesla had developed a time travel device and that it showed the past as well as the future it would dictate that mankind and mankind's history was no mistake and it would prove that destiny is the reason for life existing. The Trump family has been Protestant for many generations, mostly Lutherans and Episcopalians.

It should also be noted that being a physicist, and reading Tesla's papers about Free Energy, John Trump would have seen that being a true believer in Yeshua is the ultimate form of free energy, or perpetual motion because as scripture is quite clear, *"For in him we live, and move, and have our being; as certain also of your own poets have said, For we are also his offspring."* Acts 17:28. It is not only free energy but energy that produces freedom.

The Word Became Flesh – This is a major tenant of the Christian faith, that Yeshua was all God and all man. If John G. Trump was a man of faith, he would have held this simple but powerful phrase to be true.

Qliphoth Ouija Board – This is about Jewish Mysticism. It refers to the Kabbalistic tree of life and death. Tesla was obsessed with numbers and to some degree sacred geometry. He was interested in the number 3-6-9 sequence and how it fit into physics. I have noticed that people that start to investigate numerology, if not careful can fall into the sacred geometry trap because it seems to migrate physics with the occult. While I'm not asserting in any way that John Trump was involved in this, it has been noted that he described the writings of Nikola Tesla as doodles, scribbles, and numbers. This might be the reason why he asserted in his testimony to the FBI that what he found in the papers of Tesla was unintelligible and useless. It could also be that he found some things of worth and just excused Tesla's works as gibberish, and he would be right if it was random numbers and such, thus he would be truthful in appearance to the FBI but could retain the gibberish along with the things of worth.

Virgo Sun Sign – Don't know what it's worth, but on September 23, 2017, while his nephew is in office, the sign talked about in Revelation 12, 1-2 occurred. It isn't the events in the first two verses that are significant for this day, but in the 9th verse there is a war in Heaven, and Satan and

his rebellious angels are cast to earth. Is it just a coincidence that since 2017 it seems like all hell has broken loose on earth and it is as if Satan and his minions are on earth wreaking havoc?

The Twelfth Imam – IF John Trump was able to see the future it could be that Donald has known for years that he would be president, what events would occur, and how to circumvent trouble that is heading his way. Could it be that he told Donald that during his presidency that the antichrist who will also most likely be seen by the Islamists as the Twelfth Imam will appear on earth? When trouble comes and we look at Donald Trump it appears that he has a certain calmness about him, like he's watching things play out just like he knew they would. Could it be that John Trump allowed his nephew to use his time machine, or that he gave his nephew the ability to build his own time viewing device? Donald certainly seems to have a great look of confidence during times of crisis.

Razvan – Researching this name yielded the following results, "Meaning unknown, possibly related to the name RADOVAN. Alternatively, it may have been brought to Romania from India by Gypsies, and may mean something like "bringer of good news".

[Source: <https://www.behindthename.com/name/ra21zvan>]

What good news you might ask? I think that the revelation that a new source of energy, that will be free and is in abundant supply for all of mankind to use is pretty good news. Again, Donald Trump has talked about a revolution in the way that we power transportation and other things. Perhaps this good news originated from John G. Trump's deciphering of Tesla's papers.

Benyamin Netanyahu – Exact match. Benyamin Netanyahu is the first Israeli-born Prime Minister of Israel. It stands to reason that since he is a Sabra, he would be the one that Yahweh would trust with the secrets of Tesla. If Tesla's information was shared with the Netanyahu

Administration by the Trump Administration it could be that Israel will be unconquerable when it comes to war capabilities.

Fear to Whom Fear – This is part of a scripture in Romans, chapter 13, and has been regarded to mean submitting to worldly authorities as they are submissive to Yahweh. I believe that this is referring to John Trump's walking a tight rope with the FBI giving him Tesla's writings. He had to fear, in a sense that if the information that Tesla rendered could build a weapon that would be misused by the government were turned over, he would be held responsible for handing over such information. By telling the FBI that the information that he had reviewed was just scribbles and such, and not usable by the government (at least of his day) he would not have to fear for his actions. However, he would still fear, in some sense, that the government would catch on and that they would find out that he had hoodwinked them and that there was information left by Tesla that could be used for nefarious reasons and would be prosecuted for lying to the government. That is a burden that would be hard to bear.

Wind It Up – This is a term that refers to watches and clocks of yesteryear. The information that Tesla left upon his death was inert until it could be researched in laboratory conditions and then used. It could also mean the winding up of time, meaning that it would be data and information that would be used later on when the fullness of time was about to be accomplished.

Evaporate Darkness – This could be a direct reference that the information that he would give to Donald Trump would help Donald to drain the swamp. The best way to drain a swamp is to let the water out and then let the sun evaporate what is left. In turn, it could also be a reference to Donald Trump becoming a born-again believer in that he would see the light of what a true walk with Yeshua is and that the darkness that he once served would be dried up and replaced with the waters of righteousness.

I Serve the Darkness – This one is pretty simple. John G. Trump worked in part for the US Government. Although our government was and still is better than the rest of the governments of the world, it is still shrouded in darkness. Since John was working for darkness and held top-secret clearances then he was in a sense serving darkness.

Do Not Depart from Thine Eyes – I do believe that this was a command to John Trump's heart that he should, although serving darkness, not let righteousness depart from his true purpose in life. That purpose was to take the works of Tesla and other things that he invented and to use them for the ultimate good.

Bear Witness – A whole paper could be written about this. If John Trump was able to see the future, he was dutybound to reveal that witness to his nephew. He would have known that his nephew would someday be president, and when that would happen. Perhaps this is why Donald Trump alluded to years ago that if he felt a need to enter the presidential race he would do so, never really committing, but committing at the same time. He knew that it would happen, but didn't want to reveal it. John would also bear witness to Donald that there was a Deep State, even back during his time, but that it would become endemic so to speak during Donald's time and would have to be dealt with by his nephew. Finally, if he was able to see far enough into the future by using his time machine, he would have to bear witness that Yeshua was the Lion of The Tribe of Yehuda and that he would return, maybe during Donald's lifetime.

Study Correlations – As a physicist, and with the information left to him by Tesla, it would be John's duty to study correlations between what Tesla wrote and what could be done with the data. The true way to do this would be to build working devices that he saw in Tesla's blueprints and to use them to see if they worked or not. If some of this data had to do with time travel, then John would have to look at not only what would happen in the future, but if he was going to

reveal the information to his nephew Donald, that Donald would follow the plan to the tee and not deviate off of the plan. He might also see a correlation between what was written in scripture and what he saw, which would cause him to conclude that no matter what is done, history has been written from before the foundation of time and space and that it cannot be altered because even if what appeared to be an alteration did occur, it would have been in Yahweh's plan, not as an alteration, but as the actual plan.
