

## WHAT DOES THE GEMATRIA HAVE TO SAY ABOUT PFIZER?

### Gematria Values For Pfizer

**The Storm is Here** – “The Storm,” was a popular phrase used by followers of Qanon. Qanon warned that the storm would come that would shake the nation as well as the world. Right now, everything seems in disarray and things do not feel quite right, so the storm may indeed be here. There are still some hopeful people who feel that Trump will come back to redeem the nation and drain the swamp sometime soon.

**MMXX** – Roman numerals for 2020. Interestingly, the COVID-19 Plandemic started in early 2020 and Pfizer started working on their mRNA COVID-19 Vaccine in 2020. Coincidence?

**Urgent Message** – Yes there is an urgent message, but it is being largely ignored. The mRNA vaccines have never been fully tested and people are lining up in droves to become guinea pigs for the largest non-trial vaccine that has ever existed. Of the two mRNA vaccines, Moderna and Pfizer, it has been proven that Pfizer’s vaccine has had much worse side effects, including deaths when compared to Moderna’s vaccine.

**JMM** – This is an acronym for the Journal of Medical Microbiology, which has published many sheets about Pfizer products. This is probably a futuristic acronym for papers that will either laud Pfizer for their vaccine or applaud them for it.

**Psyop** - Psychological operations (PSYOP) are operations to convey selected information and indicators to audiences to influence their emotions, motives, and objective reasoning, and ultimately the behavior of governments, organizations, groups, and individuals. Just about any

thinking person can see that this supposed virus is just a psyop designed to make the world's population even more dependent on government while they give away their rights to their governments. The sad part is that it is working.

**JP** – The JP Morgan Group is a banking group that is very influential when it comes to decision-making policies here in America. Recently, the JP Morgan group said that the Pandemic could be over as early as this coming April. Speculation plays a very small part when it comes to the bankers, who are policymakers in reality, and if they say that the pandemic will be over in April it just might, that is if they have made enough money out of the crisis. If not, the Pandemic will continue, or new strains of the virus will emerge that will start a new pandemic or epidemic hotspots in selected areas around the world.

**Labrinth** – Pfizer's vaccine and the perceived urgency of its distribution do create a labyrinth of manufacturers, like companies that make the glass vials, other companies that make the syringes, companies that ferry the vaccine all over the country, and freight lines to distribute the vaccine to where it is supposed to go. How much you want to bet that the JP Morgan group, mentioned above is bankrolling many of these ventures so that it can make billions from inflated products and services and receive some sort of money or kickback from the US Government in its "supposed" humanitarian effort to bring the pandemic to a halt.

**Presley** – Dallas Presley was the Senior Manager of Quality Operations at Pfizer until August of 2019. This is about the time that COVID-19 started to infect people in China. One can only wonder if Dallas had a conscience and saw what was coming at Pfizer and got out while he could. It is not inconceivable that Pfizer has been working on a vaccine for COVID-19 far longer than anyone ever knew.

**Queen of Hearts** – Read with me the definition of the Queen of Hearts from “Alice in Wonderland.” Then we will analyze:

As the ruler of Wonderland, the Queen of Hearts is the character that Alice must inevitably face to figure out the puzzle of Wonderland. In a sense, the Queen of Hearts is the heart of Alice’s conflict. Unlike many of the other characters in Wonderland, the Queen of Hearts is not as concerned with nonsense and perversions of logic as she is with absolute rule and execution. In Wonderland, she is a singular force of fear who even dominates the King of Hearts. In the Queen’s presence, Alice finally gets a taste of true fear, even though she understands that the Queen of Hearts is merely a playing card. The Gryphon later informs Alice that the Queen never actually executes anyone she sentences to death, which reinforces the fact that the Queen of Hearts’ power lies in her rhetoric. The Queen becomes representative of the idea that Wonderland is devoid of substance.

So, Alice finally figures out that the queen isn’t real (like the pandemic). The queen never actually carries out her sentence of death, it is all rhetoric (like the inflated COVID-19 numbers, both sickness, and mortality). And, we discover that this whole psyop, not being real is devoid of substance. This is why the lie worked so effectively against President Trump, who was blamed for everything (off with his head), and it is now going away after Biden stole the presidency.

**Maximus** – There is a publication named Maximus.com that is the propaganda machine for Pfizer. If the cafeteria at Pfizer serves something yummy it will make its way to Maximus magazine.

**Protesters** – Everything is roses for Pfizer. There are many people worldwide who refuse to take a vaccine that has not been tested, and a vaccine that is endorsed by Bill Gates, a man who would

like to depopulate the earth of human beings. It is also been suggested, yes, even by some doctors and scientists, that Pfizer's mRNA vaccine manipulates or changes human DNA and can make a person into a chimera of sorts. Stories of nanobots being in the vaccine as well as fetal tissues from aborted children keep people from having this poison injected into their arms.

**PJ** – P.J. Dionne is a general contractor in the Boston area. Their specialty is plumbing. The clincher is that they are owned and operated by Pfizer. On a lighter note, perhaps if you are on Pfizer medications that cause constipation, you can call Pfizer to send out P.J. to clear the blockage in your sewer line.

**Spooky** – The only thing that I can come up with here is that when a few months roll on down the road and people start to come up with strange illnesses because of AED then maybe they will see the spookiness of having an untested vaccine injected into their arms and the effects that it can and will cause.

**Christopher C Miller** – HE was the acting Secretary of Defense the day that Pfizer won approval for their vaccine. He thanked the military for their heroic efforts in making the vaccine possible. Whether he was talking about the distribution process or the actual vaccine manufacture process is unclear.

**Constellation Cancer** – Constellation is a pharmaceutical company that seems to grab the attention of Pfizer, so much so that Pfizer tends to throw money their way from time to time to back their research. Much of their research is in finding drugs to fight Cancer.

**All Aliens Are the Fallen Angels** – This is a definite fact. Another fact is that when the fallen angels came in Genesis Six, they taught (according to Enoch) the cutting of roots and the making of tinctures, in other words, they taught mankind pharmacy, the manufacturing of medications. If

the COVID-19 mRNA vaccine is as dangerous as most of us think, and it can change DNA to make its taker's chimera how can we be so sure that there is an even more insidious plan to this vaccine. The fact that it was produced in such a short time and that no animal studies have been done is another clue that the fallen angels might have something to do with this vaccine.

**Lord Rayel** – This person claims to be the messiah. He is not to be confused with Rael, a French national that changed his name after he was told by demonic entities that he was an emissary from the Raelian people for Earth. Neither person, as far as I can ascertain that they either endorse Pfizer or the vaccine nor do they urge refusing it. They both appear to be neutral on the matter, however, I would suspect that Lord Rayel would someday speak out against the vaccine, stating that since he's the return of Yeshua he can heal COVID victims and the vaccine cannot.

**December Rapture** – This is a heresy that goes around from time to time. There are variants of this heresy. The first variant is that the Church of Yeshua Ha Mashiach will be raptured on Christmas. Another variant is that there will be a false rapture of the world's Elites, New Agers, and some lukewarm Christians and that this rapture will be touted as the actual rapture, causing real Christians to think that they have been left behind. The December Rapture heresy got a further boost this last Christmas because of the COVID-19 pandemic. Aided by rumors that the vaccine, especially the Pfizer vaccine contains nanobots (which it may well contain) and the fact that both the Elites, the New Age, and some supposed Christian Prophets were touting a rapture (or false rapture as the case may be), and they were forecasting something called a "Reset" within Earth's politics and religions the notion flourished. This author was once associated with someone that forecasted that this "Reset," or false rapture would occur sometime in December, specifically Christmas Day, caused a sort of "Reset" within the lineup of hosts on the show.

**Primary** – We can go two directions with this word. First off, the word “primary” is used often when it comes to the efficacy of the vaccine in trials on humans. Articles were published that stated that the vaccine reached a primary efficacy rate of 90 to 95 percent in their studies. Remember though, that these studies are on humans and little or no studies were done on lower life forms as is the norm with real efficacy tests on vaccines.

Also, it could be noted that the subject of these vaccines (Pfizer and Moderna) came up in the presidential primaries and also in the presidential debates. Lastly, I do think that history will record that the mRNA vaccines were the cause of death of hundreds of thousands if not millions of people that received them because it destroyed their immune systems and they died of a litany of diseases and health abnormalities that are waiting in the wings to destroy anybody with a destroyed immune system.

**The Eye of Ra** – Ra was known to the Egyptians as being the Sun god. Horace was the Sky god and is often equated with Ra. The eye of Horace was known to be an all-seeing eye, resembling the eye of a falcon. Horace was depicted as a man with the body of a falcon. The Masonic religion claims to have its beginnings in ancient Egypt. IF you’ve ever looked at an American one-dollar note, the reverse has a pyramid that has what is called the all-seeing eye of God. The problem is that the god on the dollar bill isn’t representative of the Bible’s God, but is the eye of Horus. The dollar bill has Masonic emblems all over it.

Many think that Pfizer has altruistic motives, in other words, they worked hard to develop a vaccine for the benefit of mankind. Truth be told, there is a lot of money involved in Pfizer’s development of the mRNA vaccine for COVID-19. Thus, the numeric equivalent of “the eye of Ra,” as it equated to Pfizer signifies that Pfizer didn’t create the vaccine to cure people. They

developed the vaccine (if it is a viable vaccine) to gain in the pharmaceutical market, to make money, and to be known as a savior of mankind.

**Jakin** – Jakin K. Patel is a pharmaceutical scientist who works for a company in South Carolina named Rite Dose. Note that Patel worked for Pfizer in 2008, so he is known by Pfizer. Rite Dose has contracted with Pfizer to manufacture the COVID-19 vaccine.

**Born Again Christians** – There has been some talk about Pfizer's vaccine having nanobots within it. If that were true, the possibility exists that it could tag individuals. Many years ago, Bill Gates addressed the CIA and showed how a vaccine could be developed that would target the brains of religious fanatics. This vaccine would supposedly kill the area of the brain that caused a person to be religious. If the Pfizer vaccine did contain nanobots that could seek out that part of the brain it would not affect areligious people because that center would not be active, however, it would target that brain area for religious people turning them areligious. Of course, this is just speculation but not beyond the realm of possibility.

**Jamil** – There is a Jamil Ali, a Scientist analyst in research and development that works for Pfizer. With this title, he would work directly with the formulation of the vaccine.

**Communism In America** – At this moment, America is turning toward Socialism. It is a unique type of socialism in that Corporate America is quashing the small business owner and taking over all elements of the economy. In the not-so-distant future, you will go to a big-box store like Costco to shop for bulk items or you will shop on Amazon for individual items and stores like Walmart for food items. When these stores have a monopoly on business, they will be set up to charge whatever price that they want to charge. We see this already in places like Walmart. A slave in China makes a fishing lure that costs less than ten cents to produce and it sells for twenty

dollars at Walmart. The masses are screaming for an increase in the minimum wage because they cannot make it on one income, or even two. In the meantime, people who are commonly known as professionals are being forced into wage freezes because employers cannot afford them anymore due to China cornering the market on cheaply made items. Medical professionals are being asked to work more hours while the employers are fighting the unions over wage freezes and benefit cuts. The system is broken and will crash. Shortly the wage of the person flipping burgers at McDonald's will equal the medical professional, who incidentally will be forced to sell their home because taxes are too high and their home prices have plummeted.

The drug companies are not feeling this pinch, however. Companies like Pfizer, Moderna, and others will be seen as saviors, the ones that saved the world from the pandemic although the pandemic was dying anyway and would have gone away on its own. Vaccine manufacturers are immune from prosecution. That's right, they cannot be sued for ill effects stemming from their poisons. Half the population could die from side effects of the vaccines and the Big-Pharma will continue to prosper. How is this? Who makes the remedy for the side effects that are caused by the vaccines? Big Pharma does of course. Corporations will pad the pockets of politicians and politicians those of the corporations. In the end, America will look very much like modern China and will devolve to what was once the Soviet Empire.

**Schizo** – Schizo is an interesting word. Many people equate it with schizophrenia and the root word fits well here. Schizo means “split,” and it is the root word where we get the term schism, which also means split. Interestingly enough, Pfizer does not produce any formulation that treats symptoms of schizophrenia, maybe because the company is the corporate epitome of the word schizo. Medicine is supposed to be dedicated to the healing of people, and many pharmaceutical companies are dedicated to this premise. Pfizer however seems split over whether it wants to

help people or make money while looking like it wants to help people. What I present next is from Wikipedia. It shows how Pfizer always seems to end up in court because it can't decide whether to help people or rob them of money or even their lives. You'll even see that one of the drugs was tested on humans without having gone through rigorous laboratory trials:

Pfizer is a party to several lawsuits stemming from its pharmaceutical products as well as the practices of various companies it has merged with or acquired.

The Quigley Company, which sold asbestos-containing insulation products until the early 1970s, was acquired by Pfizer in 1968. Asbestos victims and Pfizer have been negotiating a settlement deal that calls for Pfizer to pay \$430 million to 80 percent of existing plaintiffs. It will also place an additional \$535 million into an asbestos settlement trust that will compensate future plaintiffs as well as the remaining 20 percent of plaintiffs with claims against Pfizer and Quigley. The compensation deal is worth \$965 million all up. Of that \$535 million, \$405 million is in a 40-year note from Pfizer, while \$100 million will come from insurance policies.

Pfizer purchased Shiley in 1979, at the onset of its Convexo-Concave valve ordeal, involving the Bjork–Shiley heart valve. Approximately 500 people died when defective valves failed and, in 1994, the United States ruled against Pfizer for ~\$200 million.

A federal lawsuit was filed by a scientist claiming infection by a genetically modified virus while working for Pfizer which resulted in her being intermittently paralyzed. "McClain, of Deep River, suspects she was inadvertently exposed, through work by a former Pfizer colleague in 2002 or 2003, to an engineered form of the lentivirus, a virus similar to the one that can lead to acquired immune deficiency syndrome, also known as AIDS." The court found that McClain

failed to demonstrate that her illness was caused by exposure to the lentivirus, but also that Pfizer violated whistleblower laws.

Health insurance company Blue Cross Blue Shield (BCBS) filed a lawsuit against Pfizer for reportedly illegally marketing their drugs Bextra, Geodon, and Lyrica. BCBS is reporting that Pfizer used "kickbacks" and wrongly persuaded doctors to prescribe the drugs. FiercePharma reported that "According to the suit, the drugmaker not only handed out those "misleading" materials on off-label uses but sent doctors on Caribbean junkets and paid them \$2,000 honoraria in return for their listening to lectures about Bextra. More than 5,000 healthcare professionals were entertained at meetings in the Bahamas, Virgin Islands, and across the U.S., the suit alleges." The case was settled in 2014 for \$325M.

Controversy arose over the drug "Celebrex". Brigham Young University (BYU) said that a professor of chemistry, Dr. Daniel L. Simmons, discovered an enzyme in the 1990s that would later lead towards the development of Celebrex. BYU was originally seeking 15% royalty on sales, which would equate to \$9.7 billion. The court filings show that a research agreement was made with Monsanto, whose pharmaceutical business was later acquired by Pfizer, to develop a better aspirin. The enzyme that Dr. Simmons claims to have discovered would induce pain and inflammation while causing gastrointestinal problems, which Celebrex is used to reduce those issues. A battle ensued, lasting over six years because BYU claimed that Pfizer did not give him credit or compensation while Pfizer claims it had met all obligations regarding the Monsanto agreement. This culminated in a \$450 million amicable settlement without going to trial. Pfizer said it would take a \$450 million charge against first-quarter earnings to settle.

## Nigeria Trovafloxacin lawsuit

Main article: Abdullahi v. Pfizer, Inc.

In 1996, an outbreak of measles, cholera, and bacterial meningitis occurred in Nigeria. Pfizer representatives and personnel from a contract research organization (CRO) traveled to Kano to set up a clinical trial and administer an experimental antibiotic, trovafloxacin, to approximately 200 children. Local Kano officials reported that more than 50 children died in the experiment, while many others developed mental and physical deformities. The nature and frequency of both fatalities and other adverse outcomes were similar to those historically found among pediatric patients treated for meningitis in sub-Saharan Africa. In 2001, families of the children, as well as the governments of Kano and Nigeria, filed lawsuits regarding the treatment. According to the news program Democracy Now!, "researchers did not obtain signed consent forms, and medical personnel said Pfizer did not tell parents their children were getting the experimental drug." **The lawsuits also accuse Pfizer of using the outbreak to perform unapproved human testing, as well as allegedly under-dosing a control group being treated with traditional antibiotics in order to skew the results of the trial in favor of Trovan.** While the specific facts of the case remain in dispute, both Nigerian medical personnel and at least one Pfizer physician have stated that the trial was conducted without regulatory approval.

In 2007, Pfizer published a Statement of Defense letter. The letter states that the drug's oral form was safer and easier to administer, that Trovan had been used safely in over 5000 Americans prior to the Nigerian trial, that mortality in the patients treated by Pfizer was lower than that observed historically in African meningitis epidemics, and that no unusual side effects, unrelated to meningitis, were observed after 4 weeks.

In June 2010, the US Supreme Court rejected Pfizer's appeal against a ruling allowing lawsuits by the Nigerian families to proceed.

In December 2010, WikiLeaks released US diplomatic cables, which indicate that Pfizer had hired investigators to find evidence of corruption against Nigerian attorney general Aondoakaa to persuade him to drop legal action. The Washington Post reporter Joe Stephens, who helped break the story in 2000, called these actions "dangerously close to blackmail." In response, the company has released a press statement describing the allegations as "preposterous" and stating that they acted in good faith. Aondoakaa, who had allegedly demanded bribes from Pfizer in return for a settlement of the case, was declared unfit for office and had his U.S. visa revoked in association with corruption charges in 2010.

After reading the above, could anyone seriously allow an injection from such a company to be placed deep in an arm muscle, especially since like above, the injection is untested? Not me.

**Jeanie** – Jeanie Walls is the Senior Regulatory Affairs Manager at Pfizer Australia. She has also worked in the field of research and development for Pfizer during her 18-year career at Pfizer Australia. A senior regulatory affairs manager is responsible for working with government officials that are in charge of governmental regulations for product distribution. In layman's terms, she tries to do everything that she can to ramrod through the approval of Pfizer products. Having experience in research and development goes a long way to equip someone with the scatological terminology to convince governmental authorities to quickly approve a product, like the COVID-19 vaccine, which was approved by many governments although it never went through animal testing. Like we read in the last description, Pfizer likes to introduce medications to the general public without fully testing the product.

**Gargoyles** – Gargoyles can be found on many medieval buildings. On some buildings, they are used as gutter spouts that direct water away from the building. On other buildings, such as churches, they were often used as a superstitious method of warding off demons and other evil beings. The interesting thing that gargoyles exhibit is that they are often chimera-looking creatures, having the form of two animals, many times human-looking figures with other animal features. What I think is noteworthy is that some very intelligent people oppose the mRNA vaccine, stating that it changes the DNA of the person that receives the vaccination, technically this makes them chimera since they are a combination of two different species. The modern term that many endorse as a reference is animal/human hybrids.

**Garment of The Second Adam** – Okay, this is a stretch, but it makes sense. The Bible refers to the “Second Adam,” as Yeshua Ha Mashiach (Jesus Christ). The first Adam “Adam,” brought mankind into the bondage of sin through his disobedience while the Second Adam did away with sin through obedience and righteousness. Some, including myself, believe that one of the lies that the Man of Perdition will use to coerce people into taking his Mark is that he will promise them what he promised Chava in the garden, that she would not die and that her eyes would be opened and she would be like God. If the vaccine that mRNA vaccine that Pfizer and Moderna are offering to change a human’s DNA it could be a precursor to later vaccines or genetic engineering that would be touted as a way to achieve eternal life and divinity. We are already hearing that because of a phenomenon called ADE (Antibody-Dependent Enhancement), it may be necessary for those receiving the mRNA vaccines to have to receive boosters regularly because the vaccine tends to destroy the body’s ability to create antibodies. Could some of those boosters contain other things that could change a person’s DNA so that they aren’t completely Homo Sapien (rational man), but are Homo Noeticus, which the New Age describes as having:

- *Enhanced DNA*
- *Direct connection to higher awareness*
- *Superior mental and analytical capabilities*
- *Intuitive, talented, extra agile*
- *Extreme sensitivity to thought and emotion*
- *Healing abilities*
- *Sees unusual beings and/or strange orbs of light*
- *Nonverbal communication, like telepathy, sign language*
- *Speaking in (alien) languages*
- *Telekinetic abilities*
- *Photographic memory*
- *Past life memories*
- *Manipulation of time and space*
- *Information that they have not consciously learnt*
- *Downloaded information, “knowledge bombs” which may cause headache*
- *Able to see with various parts of their bodies*
- *Strong sense of purpose and mission*

There is a new phrase that is being used for something akin to Homo Noeticus, that being Homo Deus, which translates from the Latin to be “Man-God.” While Homo Noeticus seems to be a leap in evolution based more on a spiritual foundation, Homo Deus is used to denote evolution through technological means. A good definition of Homo Deus reads:

*Homo deus, “god man”, is a way to describe a potential next stage in human evolution where we control our own destinies and further evolution rather than being shaped or limited by nature’s mechanisms of life.*

*This could mean attaining immortality, for instance, through the use of replacement organs, cybernetics, gene manipulation, computerised brain emulation, or a combination of all these and other means of extending life.*

*Though the term may be relatively new, science fiction writers have long toyed with the philosophical ideas and consequences of man being able to shape their own biological evolution and thus becoming their own gods, in a sense.*

In either case, the idea is based on enhanced DNA and one has to ask if the beginning of this enhancement is via an injection that is supposed to protect mankind from a Plandemic formed to coerce men into taking the vaccine using covert means.

One thing that I found of interest came to me via a local newspaper, published in Albany, Oregon. The article was borrowed from other sources by the paper. The article was titled something like, “COVID-19 Might Actually Help to Prevent Getting the Virus.” Excuse me, but isn’t that what vaccines are supposed to do, to help its recipient to form antibodies that will prevent disease? The article title might have been a fluke except for one major gaff. The vaccine was never tested on animals, or very few animals so the test study animals are the people receiving the vaccine. Nazi Germany’s Dr. Mengele would have loved this sort of thing because it is essentially what he practices. Incidentally, this practice violates the Nuremberg Laws, which were ratified by the United Nations, and to my knowledge, medical procedures and medicines aren’t supposed to be used without testing on animals first according to those laws. But who

cares about laws anymore, right? The point of all this being that we receive immortality through Yeshua Ha Mashiach, and he alone, and anyone that tries to do it another way is attempting to wear the Garments of The Second Adam.

**Ophidian Kundalini Snake** – Defined, Ophidian means snakelike or snake. Kundalini is a Hindu spirit that mimics YHVH's Holy Spirit. Many new agers that claim to have a "holy spirit," actually possess a Kundalini spirit and it is manifesting in some of the false cultlike activities that are occurring in the modern Church, especially in Charismatic ministries are prevalent. Many of the manifestations of the Toronto and Pensacola revivals manifested Kundalini attributes, claiming that they were Holy Spirit manifestations. Things like jerking body motions, manifesting animal noises, and writhing on the floor in a serpentine manner are manifestations of the Kundalini Spirit.

Supposing that the mRNA vaccine is a sham and that it is meant for nefarious purposes could be an open door for the Kundalini Spirit and other malevolent spirits to enter into a person, even a Christian. If you haven't gotten the vaccine yet you might want to sit back for a few months to see what sort of manifestations arise from taking this concoction into your body. Be anxious for no thing.

**Monitorial Star** – This is an interesting numeric equivalent. It has masonic ties. The Monitorial is part of the ritual that inducts Masons into the Masonic Rite. One of the things that they are given is called "The Blazing Star." This is the first thing that I have ever seen that connects the Masonic Cult with Pfizer. After reading all that we have above concerning this vaccine, could it be part of some sort of mechanism that will be connected someday with the Masonic Lodge and the Luciferian Initiation? Remember that we talked earlier about the connection to human evolution. Some suspect that the Luciferin Initiation will be a major part of that evolution. Ask

just about any Mason that you know about their superiority to the normal man on the street. They profess to know secrets that normal people do not possess and progress in rites until they find out the truth about who the god of Masonry is, it is Lucifer, however, this knowledge is only known in the last two rites of the order.

**Aliexpress** – The only connection between Aliexpress and Pfizer is that Pfizer has a large store on this online market.

**XPX** – This is a firm that was formally called Carter Morse and Goodrich. They are investment bankers. In short, this is a consortium of bankers and ex-Pfizer research and development executives that help investors to invest in many things, including pharmaceutical stocks and securities. I'll bet that they helped many of their investors choose Pfizer stock both before and during the Plandemic and I wouldn't doubt that they get kickbacks from Pfizer.

**Hierophant Last Card** – This is a card in a Tarot Card deck. It supposedly plays the role of an advisor. If it is given in a positive aspect it stands for Tradition, Conformity, Morality, and Ethics. If it is given in its negative aspects it means Rebellion, Subversiveness, and New Approaches. From what we have learned about Pfizer and its underhanded ways, it must have been dealt with in the negative aspect. Pfizer, with its Novel Covid-19 mRNA vaccine, was birthed in rebellion. It has led to subversiveness in the pharmaceutical community and the new approach that it has used is injecting humans as test animals without any trials in the lab or animals.

**Heron's Formula** – In geometry, Heron's formula, named after Hero of Alexandria, gives the area of a triangle when the length of all three sides is known. Unlike other triangle area formulae,

there is no need to calculate angles or other distances in the triangle first. There are problems with this formula.

John D. Cook argues: Heron's formula computes the area of a triangle given the length of each side. If you have a very thin triangle, one where two of the sides approximately equal “s” and the third side is much shorter, a direct implementation of Heron's formula may not be accurate.

Now equate this with Pfizer’s mRNA vaccine. By the formula that they used and by the reasoning that they have adopted they purport that their vaccine is viable. However, they took many shortcuts, just like Heron’s formula is a shortcut, but like most shortcuts, you chance not producing the intended results.

**Arithmos Therion** – Is a mathematical theory defined thusly:

*arithmos Term Image (αριθμος)      Script Image*

*(Language: Greek)*

*Alternate Spellings:*

*Short Description: number*

*Long Description: number; for the Pythagoreans, number is the first principle (Arist.*

*Metaph.986a15); Iamblichus sometimes identifies the gods with arithmoi, regarding the*

*first numbers from the monad to the decad as deities and archetypal models of*

*manifestation; the numerical organization of the cosmos requires to treat the organizing*

*principles of bodies as physical numbers and distinguishes them from mathematical*

*numbers, which are the paradigms of physical numbers, but the ideal, noetic, or eidetic (*

*eidetikos), numbers transcend even mathematical numbers. [Source(s): The Golden Chain: An Anthology of Platonic and Pythagorean Philosophy, by Dr. Algis Uždavinys]*

Now in English: In Biblical eschatology this theorem is what is used when the Man of Perdition is mentioned in Revelation. It is the way that the number 666 is used in scripture, which says that it is the number of a man, and the number of his name, and that he is a beast that has evil intent. Using this theorem to guess who the Antichrist has never worked because he will be revealed when YHVH wants him to be revealed, thus making this theorem, in this instance, useless and nullified.

So, what does this mean when it comes to Pfizer and the mRNA vaccine? It means that if they used it to manufacture the vaccine it will come to nothing. Yes, it is being used to alter DNA, but using it as a device to bring people closer to accepting the Mark of The Beast will not work. I do believe however that it is a precursor to other modes of DNA manipulation, placing this one on a dangerous list, but on a list that will be checked off as being useless. It will however be detrimental to its recipients just like shortcuts often lead to bad choices.

**Nautilus** – A magazine that examines medicine and science. They produced an article where they proposed that the vaccine that is being given today might be effective on the Chinese strain, but that through mutation the virus has what is called an escape potential of overcoming the vaccine thus the vaccine will not be effective for other variants of the virus that are mutating. Pfizer is on record as saying that their mRNA vaccine, they feel, will be effective against these new mutations. However, since they haven't tested it effectively in other animals to see how it works, I doubt seriously that they know what it will do and what it will protect people from if it works at all.

**Ammiyts** – This is a Hebrew word, found in scripture. It means courageous, mighty, and strong. It could mean that the virus is too strong for the vaccine, which would be born out by there being a booster shot in 28 days from the first shot. It could also mean that the vaccine is too strong for the human body. We know that it increases antibodies, but that the antibodies wane in number by the 28<sup>th</sup> day, which is why the second booster is needed. But what most people do not know is that this is a repeated cycle, however, it doesn't diminish antibodies against COVID-19, but it diminishes antibodies against other maladies which can lead people to be susceptible to other diseases, even causing the body to acquire autoimmune diseases.
